

# The CircuitWerkes Telco-6 telephone ringer interface

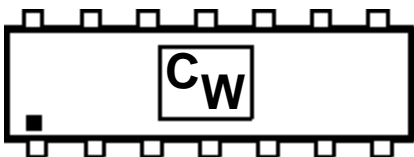

Can your air talent tell when the phones are ringing?  
The new Telco-6 lets you easily interface up to 6 phone lines to indicators\*.

**NEW  
PROBLEM  
SOLVER!**

- Accepts up to six independant telephone lines.
- Each incoming ring causes the associated relay to close for the duration of the ring.
- Each relay has *two independant sets* of form "c" contacts rated at 24Vdc and 1 Amp.
- High quality metal enclosure can be wall or table mounted.
- Optional, low cost, rack mount (1RU) available.
- All interface connections are on standard screw terminals
- List price is just \$259.

\* For safety reasons, the Telco-6 may only be used with Voltages **below** 30V.
